CLIENT

Our client

IT service provider

End client

Global CPG (Consumer Packaged Goods)

Business Challenge
of the client

Our client was under immense pressure due to urgent project deliverables, missed deadlines and keeping up with the resourcing commitments.

Challenges faced in
fulfilling this role

To find a candidate with OTM experience at lower than average market rates. Moreover, client had stringent selection criterion because of which a lot of profiles got rejected in resume screening stage itself.

What is unique and
challenging about
this closure

During this closure, client was facing budget problems and they were under budget revision. Since the client was offering very low per day rate so it was difficult to manage in between client and candidate but somehow we managed to close the position timely.
