CLIENT

Our client

A leading multinational corporation that provides business consulting, information technology and outsourcing services.

End client

Client is one of the world's largest banking and financial services organizations which serves more than 40 million customers through our global businesses: Wealth and Personal Banking, Commercial Banking, and Global Banking & Markets. Their network covers 64 countries and territories in Europe, Asia, the Middle East and Africa, North America and Latin America.

Business Challenge of the client

This was an urgent requirement from the client comes in the month of December when most of the people were on Holidays. We submitted many profiles but client was specifically looking for someone very strong in Android along with Kotlin and Retrofit.

Challenges faced in fulfilling this role

Sourcing, rightly skilled Android Developer with desired level of experience, at average pay rate was a big challenge and extensive experience in Kotlin & Retrofit was tough to find. Also they were looking for someone with start date in December only which is again very challenging.

What is unique and challenging about this closure

The major challenge was to find a candidate with the required skillset like Android with Kotlin & Retrofit. There were very less profiles with such skillset like Retrofit & Kotlin..
