CLIENT

Our client

This company is an Indian mobile app based commute transportation service company expanding their wheels to South eastern countries.

End client

This company is an Indian mobile app based commute transportation service company expanding their wheels to South eastern countries.

Business Challenge of the client

Client was looking for local speaking candidate in the field of travel & transportation.

Challenges faced in fulfilling this role

Finding the right candidate was the big problem amongst the competitors. The challenge was that client wants someone who can join as the consultant for 3 months initially because of the expansion. But there was no reliability of this company as they were expanding so finding and convincing candidate was the biggest challenge we faced.

What is unique and challenging about this closure

Candidate was expecting high salary but we managed to convince him within the client's budget and demand.
