Location	London. UK
No of yrs of exp reqd	6 + Years

Case Study: Android Developer\_ London

## CLIENT

### Our client

A leading multinational corporation that provides business consulting, information technology and outsourcing services.

### End client

Client is one of the world's largest banking and financial services organisations which serve more than 40 million customers through our global businesses: Wealth and Personal Banking, Commercial Banking, and Global Banking & Markets. Their network covers 64 countries and territories in Europe, Asia, the Middle East and Africa, North America and Latin America.

### Business Challenge of the client

Client was looking for the candidate who is well versed in android development with all expertise skill sets required to work on their project.

### Challenges faced in fulfilling this role

Sourcing, rightly skilled Android Developer with desired level of experience, at average pay rate was a big challenge and extensive experience in Kotlin & Retrofit was tough to find.

### What is unique and challenging about this closure

We got this task 2 week before the project was expected to start. We managed to get the profile during the slow moving market as it was December. But anyhow we managed to close all the jobs for the same project.
