CLIENT

Our client

The multinational information is an Indian global Information technology solutions and services LTTS

End client

It's a European organization for electro-mechanical systems for wind turbines.

Business Challenge of the client

It's a very urgent role but the resources is very less. Looking for a candidate experience in hiring technical roles in high workload environment.

Challenges faced in fulfilling this role

Sourcing the right candidate with proper skill set & less notice period.

What is unique and challenging about this closure

The resources is very less with the proper skill set and convince the candidate within location of the job because candidates do not want to relocate any other location and most of the candidate looking for remote role.
