## CLIENT

Our client

The multinational information technology company that provides business consulting, information technology and outsourcing services.

End client

It's a European financial services group operating in northern Europe and based in Helsinki, Finland

Business Challenge of the client

It's a very urgent role & the local resources is very less with proper skillset. Looking for a candidate who has very good hands on experience in Java & have prior working experience on Springboot, Hibernate etc.

Challenges faced in fulfilling this role

Sourcing the right candidate with proper skill set & budget.

What is unique and challenging about this closure

The resources is very less with proper skill set and convince the candidate within budget & location of the job because most of the candidates is not looking for a onsite job.
